

Noxudol 705-5

Solvent free heat kick cavity product

General

Noxudol 705-5 is a solvent free rust preventive product. Low viscosity binding compounds and additives have been used to make it possible to apply the product at room temperature. It forms after drying a soft, anti corrosive film.

Range of application

Noxudol 705-5 is penetrating protective oil and is intended for the treatment of the hollow spaces of motor vehicles according to standard cavity spraying methods. To achieve penetration, levelling and gelling, the object must be heated after treatment.

Instructions for use

High- or low pressure spraying for the treatment of hollow spaces according to standard cavity spraying methods. Other details can be sprayed, brushed or dipped. After application the object should be heated until it reaches a temperature of min. 80° C.

Package

40500810 / 1000 liter IBC-container

Technical data

Color:	Brown
Type of film:	Soft, waxy
Density at 20° C	910 kg/m ³
Volatility:	< 0,5 %
VOC:	< 1 %
Flash point:	> 130 °C
Film thickness:	> 40 µm
Application temperature:	18 - 30° C
Removal:	Degreaser based on white spirit, detergent or alkali
Storage time:	12 months
Storage temp:	5 - 35° C
